

Cyber Readiness as a Service (Cyber-RaaS)

NEARLY
50% of all U.S. small businesses have been the victim of a cyberattack in the past 12 months.

Ex Nihilo's **Cyber Readiness as a Service** (Cyber-RaaS) will provide you with a quick and credible assessment of your company's security posture, and a roadmap to protect your business against cyber threats.

Due to increasing privacy requirements and recent cyberattacks, the government has responded by implementing new guidelines and contractual regulations for contractors desiring to do business with them. Contractors desiring to do business with the Department of Defense (DoD) will need to meet these requirements.

WHAT SETS US APART!

The cybersecurity experts at Ex Nihilo bring to bear 20+ years of experience providing assessment services for the Department of Defense (DoD), Department of Homeland Security (DHS), government contractors and a host of private sector companies.

- We gain an understanding of your operational environment and **tailor the assessment** to the maturity level of your organization.
- We apply **in-depth knowledge of industry and cybersecurity best practices** to identify cyber risks, threats, and vulnerabilities.
- We drill **down to the security control level** to conduct a gap analysis and provide recommendations to protect your business.
- We help you develop an information security strategy to **leverage your investment and gain a competitive advantage**.
